BODGER'S WILT RESISTANT ASTERS

Our "Bodger" grown wilt-resistant Aster seed is of high quality, true to type, and as wilt-resistant as it can be made. Wilt-Resistant varieties are resistant only to wilt, in general they are more vigorous, and less susceptible to other infections. A chief enemy of Asters is the yellow disease, which is transmitted by leaf hoppers. Occasional spraying or dusting with a lasting D.D.T. containing insecticide should protect your Asters from infection. (Protexall D.D.T. 5% dust or D.D.T. 50% wettable dust.)

F₁ (Genuine) Hybrid Grandiflora Petunias

This class is the newest and in our opinion the most important innovation in Petunias since the All-Double Petunias were first introduced. Here we have hybrid vigor combined with the first really uniform true-to-type grandiflora single Petunias. All are excellent for pots and outstanding for bedding.

Ballerina. Soft glowing salmon, dwarf, compact, vigorous. 3½-4 inch blooms.

Bolero. Gorgeous carmine-rose pink flowers, well ruffled and fringed.

La Paloma. Pure white with yellow throat. Large, well fringed flowers. 100% grandiflora. Very uniform and vigorous. Sown Dec. 1, La Paloma makes a gorgeously beautiful Easter pot plant.

Tango. Bright, deep scarlet-salmon, far showier than 'Carmencita'. The reddest of all Grandiflora Petunias. Makes a blazing mass of color in the garden.

Foliage is intermediate, heavier than most early varieties, but lighter than Rutgers, giving ample protection to the fruits. **Century** has globe shaped fruit and is exceptionally free from cracks, holding its size well throughout the season. Color is a deep scarlet, ripening from the inside out, with thick outer walls and very meaty cross sections. Average weight of the fruit is 5 ounces, and it matures 4-6 days earlier than Rutgers. Firmness of the fruit makes it excellent for long distance shipping as well as local markets. Tests in both northern and southern states have shown up very favorably, both in Wilt Resistant and Production.
